

SEPTEMBER 2021

A Word from Bobby

Two Different Outcomes:

In an African village in Northern Kenya, several women, one being pregnant, went to fetch water for their family from the river. They walked about a mile to get the water and filled up their 5-gallon jerry cans and then carried the water back to their mud house. While gathering water from the river, it became time for the woman to give birth. She delivered the child naturally on the river bank with no midwife and no modern medical services to assist in her complex birthing situation. Then she and her friends walked back home with her new baby. That night something went wrong and the mother passed away.

In another village where we built and placed the Josena Medical Clinic, a woman was having a very complicated birthing situation. It was during the night and they placed the pregnant woman in a wheel-barrow and pushed her to the newly built medical clinic. She was met by a medical person that helped save her life and the baby's life. Soon she was able to go home with her newborn baby wrapped in a beautiful handmade blanket. The mother was so grateful for the clinic that she named her baby *Josena*.

What made the difference in these two situations? I believe that it was a medical clinic that was built from compassion for the medically underserved people of God. Jesus was often moved by seeing someone's suffering, then he would meet the needs with compassionate love. Biblical compassion alludes to kindness and empathy for a suffering world. To be compassionate is to not just tell someone that you care, but also to show them that you care by being there before they even ask for it. Helping to relieve human sufferings and poverty issues such as clean water, keeping children in school, helping to feed a family in need and to share the Gospel is to be alive in God's business.

It has been a great joy to work and to develop these solar powered OB/GYN medical clinics and water well projects with our friends and partners. Our goal is to build 10 medical clinics, then we want to place a fresh clean water well at each site as it is possible. Three clinics have been sent to Ghana, Africa with millions of dollars of pharmaceutical supplies and medicines. Three more clinics are completed and ready to be sent and 3 others are in the planning and developing stages.

In Acts 2:16-18 Peter reminds us of the words of Joel from the Old Testament.

¹⁶ *But, this is what was spoken by the prophet Joel:*

¹⁷ *"In the last days, God says,*

I will pour out my Spirit on all people.

Your sons and daughters will prophesy,

your young men will see visions,

your old men will dream dreams.

¹⁸ *Even on my servants, both men and women,*

I will pour out my Spirit in those days,

and they will prophesy.

It's an exciting time to be alive in Christ!

Our Vision

The vision for this ministry is to equip individuals & local churches to become more actively involved in Christian mission opportunities and service.

To our Friends and Partners

A big **thank you** to our partners in this ministry! God has used you to serve Him and those that have been overlooked or forgotten, the least.

We would love to come and share our ministry with your church, Sunday School, circle, civic group, school or community event.

Please continue to pray for this ministry as we reach out to the least and forgotten in our world!

South GA Conference advance special number

Our designated number is

#7672

It is not always easy!

This solar powered cargo container clinic took 3 months to make it from Georgia, USA to Musa Nkwanta, a village in Western Ghana. It took 4 days to get it from the port in Ghana to the village because of heavy rains. People from villages along the way helped fill trenches with sandbags, until they finally got a bulldozer to take it the last stretch. Eight hundred people showed up in the dark to see the clinic on its final resting spot. Thank you, partners, of Unto The Least of His for this terrific build-out, Williams Brothers Trucking for transport in USA, Consolidated Shipping Agencies Ltd- Conship for providing the truck and crane in Ghana, Ofosu Okutu for being the most spectacular volunteer ever, and Oscar Ofori Larbi for saving the day with a bulldozer!

The Springfield UMC solar powered OBGYN medical clinic looks great on the inside! A lot of prayers, money and hard work coupled with persistence equals a completely finished labor of love to the glory of God.

We appreciate all you do for clean water in Samburu!! New water wells in Northern Kenya are life giving! Thank you to you and your partners for these beautiful gifts.

Dear Friends and partners,

We are so blessed by the women group's Agape sewing center. The women are still using them in shifts in order to allow more women to have time to work with the machines. They are eager to learn a skill that allows them to earn income through their sewing projects and support their families needs. They are very creative and fast learners. Many are also repairing torn or damaged clothing for people in their villages. These mothers can buy food for their families and pay their children's school fees with the money they earn and are grateful for this opportunity.

Thank you again for this amazing gift. It's exciting to see how well this sewing center is working in Wamba. We hope to expand to Lerata Junction next, if God allows.

Much love & blessings to all of you,
The Agape Women's Sewing Center

Had a great time co-preaching with my dad last night. It's not the kind of opportunity that comes around often, so I knew I had to say yes, and I'm glad I did. There was no competition and not a whole lot of banter. Just the two of us committed to the message for the night, and I think we got it out. I like looking back at these pictures and seeing that when it was his turn I backed up mostly out of the scene. When it was mine, he took a seat. There's something of the gospel in there.

Rev. Josh Gale
